

# Creative Design to Power Your Vision

Last Updated Saturday, 09 January 2010

At Interlynk, we love to work with clients who place creativity at the core of their business. We speak the same language. Since inception Interlynk has developed creative design solutions for hundreds of businesses across the country, from start-ups to large corporations in a variety of industries. We specialize in helping any business across the globe communicate creativity and purpose. Our multi-skilled design team uses conventional and unconventional marketing techniques to provide a brand which can be applied consistently across online and offline channels.

Interlynk Creative Marketing Solutions include:

- Interactive web design and development
- Brand identity, including implementation and consultation
- Print design including corporate literature, annual reports and publications
- Full Color Printing of marketing communication
- SEO Management, Online Advertising and Social Marketing

The Interlynk Design Team's work on your project begins with an assessment of where you stand in the marketplace, a review of your mission, goals, sales and your preferred client or customer. What does mean for you and your business? Clear and concise graphic design to affect your bottom line. The outcome... marketing results that are useable, accessible, which ultimately work harder for you.

Interlynk takes the time to educate you how the internet works and how to master your website. We research your industry to fully learn how we can help you attract more business, retain more clients and generate more revenue in the global marketplace.
