

# Website Design Solutions

Last Updated Monday, 22 September 2008

We pride ourselves in providing cutting edge technology, innovative web design and marketing to help our clients remain competitive in an ever-changing global market. Our goal isn't just repeating the same thing again and again but achieving higher levels of control and growth over every aspect of website performance.

Our dynamic teams of developers add extra functionality to your web site project; shopping carts for instant online sales, content management systems. We can create a concept sites to help launch your creative dream, or a directory like Yahoo or Google for business and trade organizations. We become involved in the bigger picture, sharing our experience and helping our clients to define markets. The Services we offer are as follows:

## Website Design

Complete content management websites, blog systems, with unlimited pages and unlimited products. Optional full ecommerce shopping carts using a payment gateway of your choice (full support for Google, Worldpay, Paypal, etc).

## Site Maintenance & Support

Access to a simple to use web interface allowing you to fully update your website as often as you need. We also provide monthly site updates at no extra cost.

## Google Adwords Management

We can manage your online Adwords budget - a simple but highly effective pay per click (ppc) online advertising solution.

## Traffic Building

We can manage your search engine strategy, directory listings, incoming links building and provide guidance on search engine optimized (seo) copywriting. We will write, edit and execute your newsletter campaign via email or direct mail.

## Affiliate Marketing & Dropship

We can initiate, manage and help you grow an affiliate network - 3rd party websites receiving a commission for selling your goods/services. We understand online drop ship and can help you implement the logistical systems required to leverage this massively successful web selling approach.

## Training

We can provide training sessions geared to any aspect of our web development projects and deliver these onsite at your premises, offsite at our premises or even online using sophisticated web conferencing software.

We've been in business for 11 years. Do you know what that means? We are experts at creating successful website and business internet solutions, implementing web design, and web applications.
