

About Interlynk Design Team

Last Updated Monday, 01 September 2008

We pride ourselves in providing cutting edge technology, innovative design and marketing to help our clients remain competitive in an ever changing global market. We become involved in the bigger picture, sharing our experience and helping our clients to define markets.

We develop and manage web services and applications. Our services include development, interface design, training, consulting, support and hosting. Our goal isn't just repeating the same thing again and again but achieving higher levels of control and growth over every aspect of performance. We're experts in implementing branding, promotions, innovative design, web development, web applications and content management solutions.

Our dynamic team of developers are internationally respected. We have been delivering web solutions and services since 1996 for clients such as Worldspan, Cobb Housing, and Georgia Public School System.
